COMMUNITY COLLEGE SUMMIT

Building Gateways to the Green Economy

A Green Technology Event

GATEWAYS TO THE GREEN ECONOMY

California's green economy is growing fast, and community colleges will play a central role in building a skilled and diverse green workforce.

At the same time, campuses throughout the California community college system are implementing innovative green building, energy efficiency and renewable projects. These projects are creating opportunities for students to experience new technologies, and possibilities for hands-on training and apprenticeships.

This Summit will be the first to focus on the interrelationships of these trends - and the opportunities they are creating for students, campuses and communities!

THE TWO-DAY EVENT WILL FEATURE GENERAL SESSIONS WITH KEYNOTES, SPEAKERS AND MORE THAN 30 WORKSHOPS AND SESSIONS ADDRESSING THE FULL RANGE OF GREEN WORKFORCE, EDUCATION AND BUILDING ISSUES. TOPICS WILL INCLUDE:

- Building Design and Construction
- The Business Case for Going Green
- Educating the New Green Workforce
- The Sustainable Campus – A Model for the Community
- Meeting Current and Evolving Workforce Needs for the Green Economy

FEATURED SPEAKERS INCLUDE:

Rosario Marin

Secretary, State and Consumer Services
State of California

Timothy A. Simon

Commissioner
California Public Utilities Commission

Rocky Young

Chancellor Emeritus
Los Angeles Community College District

Larry Eisenberg

Executive Director
Facilities Planning and Development
Los Angeles Community College District

Bharat Patel
